PROJECTS

SKILL MATRIX – ONLINE EXAM WEB APPLICATION

A full-stack Java-based web application designed to streamline online examinations. The project features two core modules:

- Admin Module:** Enables administrators to create exams, manage questions, monitor student performance, and generate reports.
- Student Module:** Allows students to register, take exams, view results, and track progress.

Built using technologies such as **Java, JSP, SERVLET, SQL YOG and HTML/CSS** the application ensures secure login, dynamic question rendering, and real-time result computation. This project demonstrates strong skills in backend development, frontend integration, and database management.
